

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

BUREAU OF AIR

DIVISION of AIR POLLUTION CONTROL

PERMIT SECTION

PROJECT SUMMARY for the
DRAFT TITLE V - CLEAN AIR ACT PERMIT PROGRAM (CAAPP) PERMIT

Meyer Industrial Container, LLC
610 West 81st Street, Chicago, Cook County, 60620

Permit Engineer/Technical Contact: Anatoly Belogorsky, 217/782-2113

Community Relations/Comments Contact: Brad Frost, 217/782-7027

May 20, 2005
Springfield, Illinois

I. INTRODUCTION

This source has applied for a renewal of the Title V - Clean Air Act Permit Program (CAAPP) operating permit (I.D. 031600AXT, Permit # 95120062) for its existing operation. The CAAPP is the program established in Illinois for operating permits for significant stationary sources as required by the federal Clean Air Act, as amended in 1990, and 40 CFR Part 70. Unlike state operating permits, the conditions in a CAAPP permit are enforceable by both the Illinois Environmental Protection Agency (Illinois EPA) and the USEPA. This document is for informational purposes only and does not shield the Permittee from enforcement actions or its responsibility to comply with applicable regulations. This document shall not constitute a defense to a violation of the Act or any rule or regulation.

A Title V permit contains conditions listing the applicable state and federal air pollution control regulations that apply to a source. The permit conditions also establish emission limits, appropriate compliance procedures, and specific operational flexibility. The appropriate compliance procedures may include monitoring, record keeping, and reporting to show compliance with these requirements. The Permittee must carry out these procedures on an on-going basis to demonstrate that the source is operating in accordance with the requirements of the permit.

II. KEY ELEMENTS OF THE PROPOSED PERMIT

This Title V permit is divided into several sections and the following are the important segments that maybe of interest to the general public:

- a. Source identification
- b. List of abbreviations and acronyms commonly used
- c. Insignificant activities
- d. Significant emission units operated at the source (Section 4)
- e. Overall source conditions (Section 5)
- f. Conditions for emissions trading programs (Section 6)
- g. Conditions for specific significant emission units (Section 7)
- h. General permit conditions (Section 8)
- i. Standard permit conditions (Section 9)
- j. Attachments (Section 10)

III. SOURCE DESCRIPTION INFORMATION

- a. Location and nature of business

Meyer Industrial Container is located at 610 West 81st Street in Chicago. The source reconditions and recycles industrial shipping containers. Coatings are used to provide a durable, protective finish that resist weathering, abrasion, impacts, and in the case of interior linings, provide chemical resistance to the contents of the container. The drums are cleaned to remove residue either in a drum furnace or by using a caustic solution washer. The method chosen depends on the residue material and type of drum. The drums

are then shot blasted to complete the cleaning process and then are coated. The source has four coating booths for interior, and exterior coatings. After the coating operation is complete, the finished drums have cover gaskets glued onto the covers.

b. National Ambient Air Quality Standard status for this area

This source is located in an area that is non-attainment for ozone, PM_{2.5} and PM₁₀ and attainment for other pollutants of the National Ambient Air Quality Standards.

c. Major source status

This permit is issued based on the source requiring a CAAPP permit as a major source of VOM and HAP emissions.

d. Significant emission units

Emission Unit	Description	Date of Construction	Emission Control Equipment
Unit 01 Coating Lines	Drum Rings Hand Dipped and Air Dried (RD-1)	All Lines - October 1981	None
	Open Head Spray Booth for Interior and Exterior Coating (SPB-2)		Filters
	Tight Head Spray Booth for Interior and Exterior Coating (SPB-1)		Filters
	Lid Spray Booth for Interior and Exterior Coating (LB-1)		Filters
	Natural Gas-Fired Oven (OV-1) for Drying Coated Metal Parts in Line With Coating Booths SPB-2 & LB-1		None
	Natural Gas-Fired Oven (OV-2) for Drying Coated Metal Parts in Line With Coating Booth SPB-1		None
Unit 02 Drum Cleaning/ Reclamation Furnace	Natural Gas-Fired Drum Cleaning/Reclamation Furnace (11.7 mmBtu/Hr)	November 1993 (Modified in 2004 by Installation PTE)	Permanent Total Enclosure (PTE) and Afterburner
Unit 03 Shot Blasters	Shot Blasters (SB-1 and SB-2) for Removing Scales	October 1981	Baghouse for Each Shot Blaster

IV. EMISSIONS INFORMATION

The proposed permit limits the source wide maximum annual emissions from significant emission units at the source. Insignificant activities at this source are not accounted for in the source-wide limit. Further unit

specific emission unit limitations are found within Sections 5 and 7 of the proposed permit.

For purposes of fees, the source is allowed the following emissions:

Pollutant	Tons/Year
Volatile Organic Material (VOM)	58.01
Sulfur Dioxide (SO ₂)	0.03
Particulate Matter (PM)	11.92
Nitrogen Oxides (NO _x)	5.10
HAP, not included in VOM or PM	----
Total	75.06

This proposed permit contains terms and conditions that address the applicability, and, if determined applicable, substantive requirements of Title I of the Clean Air Act (CAA) and regulations promulgated thereunder, including 40 CFR 52.21, Prevention of Significant Deterioration (PSD) and 35 IAC Part 203, Major Stationary Sources Construction and Modification. Any such terms and conditions are identified within the proposed permit by T1, T1R, or T1N. Any conditions established in a construction permit [T1] pursuant to Title I and not revised or deleted in this proposed permit, remain in effect pursuant to Title I provisions until such time that the Illinois EPA revises or deletes them. Where the source has requested that the Illinois EPA establish new [T1N] or revise [T1R] such conditions in a Title I permit, those conditions are consistent with the information provided in the Title V application and will remain in effect pursuant to Title I provisions until such time that the Illinois EPA revises or deletes them.

This proposed permit does not establish any new [T1N] requirements or revised [T1R] requirements.

V. EMISSIONS CONTROL PROGRAMS INFORMATION

Emissions Reduction Market System (ERMS)

Because this source is located in the Chicago ozone non-attainment area and emits volatile organic material (VOM), the proposed permit includes conditions to implement the Emissions Reduction Market System (ERMS). The ERMS is a market-based program designed to reduce VOM emissions from stationary sources to contribute to reasonable further progress toward attainment, as further described in Section 6.0 of the proposed permit. The proposed permit contains the Illinois EPA's determination of the source's baseline emissions and allotment of trading units under the ERMS, and identifies units not subject to further reductions.

VI. MONITORING and COMPLIANCE ASSURANCE MONITORING (CAM) PLAN INFORMATION

- a. The Compliance Assurance Monitoring (CAM) plan is a program for pollutant-specific emission units which use an add-on control device to achieve compliance with an emission limitation or standard, has potential pre-control device emissions of the applicable regulated air pollutant that are equal to or greater than major source threshold levels, and is not specifically exempt

by 40 CFR Part 64. Subject units and the CAM plans are identified in Attachment 3 of the proposed permit.

- b. The following emission units (or group of emission units) at the source utilize instrumental or non-instrumental monitoring procedures for verifying compliance with existing emission standards and/or limitations:

Emission Unit (Group of emission units)	Instrumental Monitoring Procedures (values and parameters measured)	Non-instrumental Monitoring Procedures (testing, recordkeeping, inspections, operational practices, etc.)	CAM Applicability Yes/No (based on the information provided in the CAAPP)
Drum Cleaning/ Reclamation Furnace	Maintain a Minimum of 1600°F When Introducing Drums to the DRF	Testing and recordkeeping requirements	Yes
Coating Lines	None	Testing and recordkeeping of the VOM applied materials	No
Shot Blasters	None	Testing and recordkeeping requirements	No

VII. OTHER PERTINENT INFORMATION

a. Fugitive Particulate Matter Operating Program

The fugitive operating program is intended to significantly reduce fugitive particulate matter emissions within certain affected locations and facilities in Illinois. The source is subject to the fugitive operating program for particulate matter. Normally, affected operations by this program include, but are not limited to, addressing normal traffic pattern roads, parking facilities, and material piles and handling. Usually a source addresses the programs through the use of water, oils, or chemical dust suppressants.

b. Risk Management Plan (RMP)

A risk management plan (RMP) is a program required for a source affected by Chemical Accident Prevention for reducing the levels of emissions during an emergency, consistent with safe operating procedures. If the Permittee becomes subject to the RMP then the Permittee would be required to immediately implement the appropriate steps described in this plan should an emergency be declared. The Permittee then would be required to maintain and have this plan on file with the Illinois EPA.

c. Episode Action Plan (EAP)

An episode action plan (EAP) is a program for reducing the levels of emissions during yellow alerts, red alerts, and emergencies, consistent with safe operating procedures. The Permittee is required to immediately implement the appropriate steps described in this plan should an air pollution alert or emergency be declared. The Permittee is required to maintain and have this plan on file with the Illinois EPA.

d. PM₁₀ Contingency Measure Plan

If the Permittee becomes subject to a contingency measure plan then the Permittee will be required to prepare and submit a contingency measure plan reflecting the PM₁₀ emission reductions. Such plan will be incorporated by reference into the proposed permit and shall be implemented by the Permittee.

VIII. COMPLIANCE INFORMATION

The source has certified compliance with all applicable rules and regulations; therefore, a compliance schedule is not required for this source.

IX. REQUEST FOR COMMENTS

It is the Illinois EPA's preliminary determination that this source's permit application meets the standards for issuance of a Title V permit. The Illinois EPA is therefore proposing to issue a Title V permit, subject to the conditions proposed in the draft permit.

Comments are requested by the Illinois EPA for the proposed permit. If substantial public interest is shown in this matter, the Illinois EPA will consider holding a public hearing in accordance with 35 Ill. Adm. Code Part 166.
